CONTENTS OF ISSUE 169 (1–3)

Special Issue on In-Vessel Retention

Introduction ix

In-vessel coolability and retention of a core melt
*T.G. Theofanous, C. Liu, S. Additon, S. Angelini, O. Kymäl*äinen, T. Salmassi 1

The first results from the ACOPO experiment
T.G. Theofanous, M. Maguire, S. Angelini, T. Salmassi 49

The coolability limits of a reactor pressure vessel lower head
T.G. Theofanous, S. Syri 59

Ex-vessel boiling experiments: laboratory- and reactor-scale testing of the flooded cavity concept for in-vessel core retention Part I: Observation of quenching of downward-facing surfaces
T.Y. Chu, B.L. Bainbridge, R.B. Simpson, J.H. Bentz 77

Ex-vessel boiling experiments: laboratory- and reactor-scale testing of the flooded cavity concept for in-vessel core retention Part II: Reactor-scale boiling experiments of the flooded cavity concept for in-vessel core retention
T.Y. Chu, J.H. Bentz, S.E. Slezak, W.F. Pasedag 89

Creep considerations for the lower head
Y.R. Rashid 101

In-vessel retention of corium at the Loviisa plant
O. Kymäläinen, H. Tuomisto, T.G. Theofanous 109

Turbulence modelling for large volumetrically heated liquid pools
T.N. Dinh, R.R. Nourgaliev 131

On heat transfer characteristics of real and simulant melt pool experiments
T.N. Dinh, R.R. Nourgaliev, B.R. Sehgal 151

Effect of fluid Prandtl number on heat transfer characteristics in internally heated liquid pools with Rayleigh numbers up to 10^{12}
R.R. Nourgaliev, T.N. Dinh, B.R. Sehgal 165

SULTAN test facility for large-scale vessel coolability in natural convection at low pressure
S. Rougé 185
